

# Code Test - QA Automation Engineer

## Introduction

Prepare a working, suitable for automation test suite including instructions on how to run it, with the following Gherkin style scenarios as base.

Extending the use cases is a plus.

## Feature: Register

GIVEN	an internet user
WHEN	going to <a href="https://pro.packlink.es/registro">https://pro.packlink.es/registro</a>
THEN	it will see the registration form with required fields

GIVEN	an internet user
WHEN	registered in <a href="https://pro.packlink.es">https://pro.packlink.es</a> WITH credentials <a href="mailto:gacandidate+{yourname}@packlink.es">gacandidate+{yourname}@packlink.es</a> and random password
THEN	it will land into the platform dashboard

## Feature: Search

GIVEN	a registered client
WHEN	performing a search with the following information: Madrid -> Madrid. One parcel, 1 kg, 10 cm x 10 cm x 10 cm.
THEN	it will select the first service of the list

## Feature: Draft Shipments

GIVEN	a registered client
WHEN	a service has been selected
THEN	it will save the shipment as a draft
AND	it will appear in the shipment list

## Remarks

- {yourname} is a placeholder for your name and surname, ASCII chars, no spaces. You can extend this to allow multiple runs.
- **The description of the exercise is deliberately loose in order to evaluate your analytical skills.**
- Clarity, readability and structure of the code are also part of the evaluation criteria.
